DSP Data and System Planning

IT and Consulting Services for Ports and Shipping since 1986

Who are we?

- A worldwide business partner to support ports and terminals in the development and implementation of Terminal Operating Systems, change management, process improvement and optimisation.
- A proven team of operations and technology experts who can manage planning and control optimisation, training, process automation design and systems integration, testing strategy and project management.
- IT provider of tailored solutions for reporting and business intelligence, billing and contract lifecycle management

Partners

DSP is partnering with Kalmar since 2016 assisting customers both on process and terminal automation.

DSP is a Project Lead Implementation Partner of NAVIS since 2007 and thanks to a strong team of certified consultants with operational experience in container terminal covers Navis products implementation, support and extensions.

What more can we offer you?

Innovation

We have been the first IT company operating in the shipping lines market - we have been the first NAVIS partner – we struggle to drive the new technological challenges and the digital transformation revolution.

Experience

We are in the market for over 30 years.

Reliability

We carry out the project with you providing a dedicated and qualified team.

Worldwide coverage

Regardless of your location, we are at your side.

Knowledge sharing

Our experience is shared among all team members through an internal knowledge network.

Cost effectiveness

Conscious of the challenges of our customers, we structured ourselves in a way to be competitive, efficient and effective in our services.

Team

32 experts, as of which 22 TOS professional service consultants operating worldwide

TOS Projects

DSP successfully managed over 50 TOS projects worldwide, In the last 5 years.
